

For Gods sake whats next, restrictions on what type of underware we are allowed to buy? XM Radio is the greatest thing to come along since sliced bread. I drive 70,000 miles a year and cant tell how monotonous the same old crap becomes on local broadcasting stations , not to mention the commercials and crap traffic and weather from locals jocks who think adding their own form of comedy is amusing. You know the old saying "If ya cant take the heat....." When are we going to tell special interest groups and whore lobbyist's to back off and let the American public decide what is best for them, after all, what I prefer to listen to on local broadcasting is my choice isnt it ?, especially when I decide to "PAY FOR IT !!!! or have the socialists decided to control that too ?.
